QUESTIONS?

cfp@hardwear.io

Since 2015, Hardwear.io provides an international platform for security researchers and industry professionals to present their current research on attacking and defending hardware. Hardwear.io USA 2021 is seeking original, groundbreaking, and creative papers, so if you've done any cutting-edge offence/defence research and want to share it to the security community, it's time to submit your research paper! Submission topics include, but are not limited to:

Smart cards: identification, access controls, pay TV

IoT devices: automotive, medical, mobile payment, mobile connected devices

Trusted computing: mobile TPM, Trusted Execution Environments

Embedded systems: Firmware, operating systems, memory, virtual machines

Trojans and backdoors: Counterfeit Detection and prevention

Attacks and countermeasures:

Side-channel , Fault Injection, EMFI, Tempest attacks and countermeasures

Reverse engineering, (anti-)cloning, (anti-)tampering, (anti-)counterfeiting

You are invited to submit your research/tool electronically by the submission link: <https://bit.ly/3tjUb31>

Good luck!

Hardwear.io Team
